## *Notification of Test Results*

**10 May 1994**

This notice documents the results of an Air Force CALS Test Bed (AFCTB) Quick Short Test Report (QSTR) evaluation of data submitted by:

### **Grumman Aerospace Corporation**

Identified as follows:

Title:	<b>Technical Raster Transfer</b>
Program:	<b>F-15 Downsized Tester (DST)</b>
Program Office:	<b>SA/ALC-TIRA</b>
Contract No.:	<b>F41608-39-D-0064</b>
QSTR No.:	<b>AFCTB-ID 94-041</b>

Received on the following media:   **9-track magnetic tape**

The results of the AFCTB Quick Short Test Report evaluation are as follows:

MIL-STD-1840A Media Format:	<b>Pass</b>
MIL-D-28000A IGES:	<b>N/A</b>
MIL-M-28001A SGML:	<b>N/A</b>
MIL-R-28002A Raster:	<b>Pass</b>
MIL-D-28003 CGM:	<b>N/A</b>

Formal results with associated disclaimer are documented and available from the AFCTB.

## 1. Introduction

### 1.1 Background

The Department of Defense (DoD) Air Force Continuous Acquisition and Life-cycle Support (CALS) Test Network (AFCTN) is conducting tests of the military standard for the Automated Interchange of Technical Information, MIL-STD-1840A, and its companion suite of military specifications. The AFCTN is a DoD sponsored confederation of voluntary participants from industry and government managed by the Electronic Systems Center (ESC).

The primary objective of the AFCTN is to evaluate the effectiveness of the CALS standards for technical data interchange and to demonstrate the technical capabilities and operational suitability of those standards. Two general categories of tests are performed to evaluate the standards; formal and informal.

Formal tests are large and comprehensive, which follow a written test plan, require specific authorization from the DoD, and may take months to prepare, execute, and report.

Informal tests are quick and short, used by the AFCTN technical staff, to broaden the testing base. They include representative samples of the many systems and applications used by AFCTN participants. They also allow the AFCTN staff to gain feedback from many industry and government interpretations of the standards, to increase the base of participation in the CALS initiative, and respond to the many requests for help that come from participants. Participants take part voluntarily, benefit by receiving an evaluation of their latest implementation (interpretation) of the standards, interact with the AFCTN technical staff, gain experience using the standards, and develop increased confidence in them. The results of informal tests are reported in Quick Short Test Reports (QSTRs) that briefly summarize the standard(s) tested, the hardware and software used, the nature of the test, and the results.

## 1.2 Purpose

The purpose of the informal test, reported in this QSTR, was to analyze Grumman Aerospace's interpretation and use of the CALS standards in transferring technical Raster data. Grumman used its CALS Technical Data Interchange System to produce data, in accordance with the standards, and delivered it to the AFCTN technical staff on a 9-track magnetic tape.

## 2. Test Parameters

**Test Plan:** AFCTB 94-041

**Date of Evaluation:** 10 May 1994

**Evaluator:**  
George Elwood  
Air Force CALS Test Bed  
DET 2 HQ ESC/AV-2P  
4027 Colonel Glenn Hwy  
Suite 300  
Dayton OH 45431-1672

**Data Originator:**  
Joe Migliore  
Grumman Aerospace Corporation  
M/S A53-143  
Sunrise Highway  
Great River NY 11739  
516 224-8276

**Data Description:**  
Technical Manual Test  
1 Document Declaration file  
8 Raster files

**Data Source System:**  
1840  
**HARDWARE**  
Sun Microsystems SPARC Station IPC Platform  
SunOS 4.1.3  
**SOFTWARE**  
Interleaf CALSplus v5.1.3

**Raster**  
**HARDWARE**  
Sun Microsystems SPARC Station IPC Platform  
SunOS 4.1.3  
**SOFTWARE**  
Interleaf CALSplus v5.1.3

**Evaluation Tools Used:**

**MIL-STD-1840A (TAPE)**  
SUN 3/280

AFCTN Tapetool v1.2.10 UNIX  
XSoft CAPS/CALS v40.4

**MIL-R-28002 (Raster)**  
HP 735

InterCAP X-Change v7.82

SGI Indigo2

IGES Data Analysis (IDA) CALSView

SUN SparcStation 2

Carberry CADLeaf Plus v3.1

AFCTN validg4

AFCTN xrastb.sun4

IDA IGESView v3.0

PC 486

AFCTN validg4

IDA IGESView Windows

Inset Systems HiJaak Pro

Expert Graphics RxHighlight v1.0

**Standards**

**Tested:**

MIL-STD-1840A

MIL-R-28002A

### **3. 1840A Analysis**

#### **3.1 External Packaging**

The tape arrived at the Air Force CALS Test Bed (AFCTB) enclosed in a commercial overnight bag. The exterior of the bag was not marked with a magnetic tape warning label, as required by MIL-STD-1840A, para. 5.3.1.3.

The tape was not enclosed in a barrier bag or barrier sheet material, as required by MIL-STD-1840A, para. 5.3.1.2. The tape reel was missing a label indicating the recording density, as required by MIL-STD-1840A, para. 5.3.1. Some 9-track tape units require this BPI to be set manually. A packing list showing all files recorded on the tape was not enclosed.

#### **3.2 Transmission Envelope**

The 9-track tape received by the AFCTB contained MIL-STD-1840A files. The files were named per the standard conventions.

##### **3.2.1 Tape Formats**

The tape was run through the AFCTN Tapetool v1.2.10 utility. No errors were encountered while evaluating the contents of the tape labels.

The tape was read using XSoft's CAPS read1840A utility without any reported errors.

The physical structure of the tape meets the CALS MIL-STD-1840A and ANSI x3.27 requirements.

##### **3.2.2 Declaration and Header Fields**

No errors were found in the Document Declaration file and data file headers. This portion of the tape meets the CALS MIL-STD-1840A requirements.

## 4. IGES Analysis

No Initial Graphics Exchange Specification (IGES) files were included in this evaluation.

## 5. SGML Analysis

No Standard Generalized Markup Language (SGML) files were included in this evaluation.

## 6. Raster Analysis

The tape contained eight Raster files. The AFCTB has several tools for viewing Raster files. These tools are not used to generate a pass/fail but to report how commercially available software can handle the files. Many of these products are used in the development of technical publications and are good indicators of usability. The use of these products is not an endorsement nor an indication of CALS capability. All operations were performed using the default settings.

All files were evaluated using the AFCTN *validg4* utility. This program reported all eight files meet the CALS MIL-R-28002A specification.

The files were read into the AFCTN *xrastb.sun4* viewing utility. No problems were noted.

The Raster files were read into Carberry's *CADLeaf* software and displayed without a reported error.

The files were read using IDA's *CALSVIEW* and displayed without a reported error.

The files were read into IDA's *IGESVIEW* and *IGESVIEW for Windows* and displayed without a reported error.

The files were read into Inset Systems' *HiJaak for Windows* and displayed without a reported error.

The files were read using InterCAP's *X-Change* and displayed without a reported error.

---

The Raster files were imported into Expert Graphics' Rx-Highlight and displayed without a reported error.

The Raster files meet the CALS MIL-R-28002A specification.

## 7. CGM Analysis

No Computer Graphics Metafile (CGM) files were included in this evaluation.

## 8. Conclusions and Recommendations

The tape from Grumman Aerospace Corporation was correct. The tape could be read properly using the AFCTN Tapetool software without any reported errors. The physical structure of the tape meets the CALS MIL-STD-1840A requirements.

The Raster files meet the CALS MIL-R-28002A specification.

The tape and files submitted by Grumman Aerospace Corporation meet the requirements defined in CALS MIL-STD-1840A.

---
